

Provisional agenda for the third REDFISH project meeting
19-23 February 2002, Institute of Marine Research, Eduardo Cabello 6, 36208 Vigo, Spain

1. Welcome (19 February, 10.00 hours)

1.1 Adoption of rapporteur

1.2 Housekeeping

1.3 Adoption of agenda (10.30)

2. General discussion on project issues

2.1 Development and collaboration

2.2 News, problems or unforeseen events and necessary actions by the consortium

2.2 Annual report 2001

2.3 Web site of the project

2.4 REDFISH Project data bases (individual fish, survey, commercial)

3. Workpackage 1: Species and population structure

3.1 Sub-workpackage 1.1: Morphological analysis, rapporteur : Fran Saborido-Rey

3.1.1 State of the art of the sub-workpackage, short description

3.1.2 Overview on available data and samples, by nation, quality and quantity

3.1.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity

3.1.4 Provisional results

3.1.5 Individual fish data base field structure

3.1.6 Deliverables and milestones up to 2001 and to be delivered in 2002

3.2. Sub-workpackage 1.2: Otolith structures and elemental contents, rapporteur : Christoph Stransky

3.2.1 State of the art of the sub-workpackage, short description

3.2.2 Overview on available data and samples, by nation, quality and quantity

3.2.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity

3.2.4 Provisional results

3.2.5 Individual fish data base field structure

3.2.6 Deliverables and milestones up to 2001 and to be delivered in 2002

3.3 Sub-workpackage 1.3: Genetic separation of species and stocks, rapporteur : Gunnar Nævdal

3.3.1 State of the art of the sub-workpackage, short description

3.3.2 Overview on available data and samples, by nation, quality and quantity

3.3.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity

3.3.4 Provisional results

3.3.5 Individual fish data base field structure

3.3.6 Deliverables and milestones up to 2001 and to be delivered in 2002

4. Workpackage 2: Reproductive strategies

4.1 Sub-workpackage 2.1: Reproductive cycle by species, stock and sex, rapporteur : Fran Saborido-Rey

4.1.1 State of the art of the sub-workpackage, short description

4.1.2 Overview on available data and samples, by nation, quality and quantity

4.1.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity

4.1.4 Provisional results

4.1.5 Individual fish data base field structure

4.1.6 Deliverables and milestones up to 2001 and to be delivered in 2002

4.2 Sub-workpackage 2.2: Female fecundity by species and stock, rapporteur : Fran Saborido-Rey

4.2.1 State of the art of the sub-workpackage, short description

4.2.2 Overview on available data and samples, by nation, quality and quantity

4.2.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity

4.2.4 Provisional results

4.2.5 Individual fish data base field structure

4.2.6 Deliverables and milestones up to 2001 and to be delivered in 2002

5. Workpackage 3: Abundance and demography

5.1 Sub-workpackage 3.1: Survey evaluation by species, stock and size, rapporteur : Hans-Joachim Rätz

5.1.1 State of the art of the sub-workpackage, short description

5.1.2 Overview on available data and samples, by nation, quality and quantity

- 5.1.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity
- 5.1.4 Provisional results
- 5.1.5 Survey data base field structure
- 5.1.6 Deliverables and milestones up to 2001 and to be delivered in 2002

5.2 Sub-workpackage 3.2: Evaluation of commercial catch statistics, rapporteur : Thorsteinn Sigurdsson

- 5.2.1 State of the art of the sub-workpackage, short description
- 5.2.2 Overview on available data and samples, by nation, quality and quantity
- 5.2.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity
- 5.2.4 Provisional results
- 5.2.5 Commercial data base field structure
- 5.2.6 Deliverables and milestones up to 2001 and to be delivered in 2002

5.3 Sub-workpackage 3.3: Age determination and validation by species and stock, rapporteur : Kjell Nedreaas

- 5.3.1 State of the art of the sub-workpackage, short description
- 5.3.2 Overview on available data and samples, by nation, quality and quantity
- 5.3.3 Overview on data and samples to be collected in 2002 by nation, quality and quantity
- 5.3.4 Fish results
- 5.3.5 Individual fish data base field structure
- 5.3.6 Deliverables and milestones up to 2001 and to be delivered in 2002

6. Final REDFISH project meeting in 2003

- 6.1 Dates and venue
- 6.2 Structure of the meeting (working group, scientific symposium ect.)

7. Adoption of the report and adjournment
